

## **OUR WAY FOR POSITIVE DEVELOPMENT FOR AFRICA**

### **Memorandum**

We are a non for profit network dedicated to Africa's sustainable social and economic development. Operating from abroad and within, we aim to promote sustainable social and economic development between other continents and Africa in respect to African masses primary needs and cultural realms. We strive to explore for, and encourage definitive ways for collective achievements and mutual assistance. The immediate paramount objective would be to release the masses of the exploitation and speculation for basics consumption needs.

We are committed to enhance ties with African Union (AU), African and foreign diplomatic corps in Africa and abroad, governments, NGO and industries operating and interested in Africa in order to fully explore collective entrepreneurship opportunities and integration in development programs towards Africa of new generation of qualified professional Africans of the Diaspora and within Africa. We are committed to globalize and trade in the exchange of African expertises for synergistic inter African countries development. We believe the above undertakes will stimulate the return, integration and reduce Africans and Africans professionals migration and education investment lost, while strengthening the African union and networking inside and outside the continent.

Africa has been remarkably under foreign influences due to its past history and facing with strong values, identity and development priorities crises. Today as new generation of dedicated Africans, we will strive definitively towards genuine, strategic, healthy and wealthy partnership by opening to other continents opportunities and experiences. Therefore we will engage in strong partnership with those willing to not only see Africa as their possession, business or trade space for income and investment, but as independent and diverse cultural realms with interested humanitarian space and spirit to develop in mutual respect and solidarity.

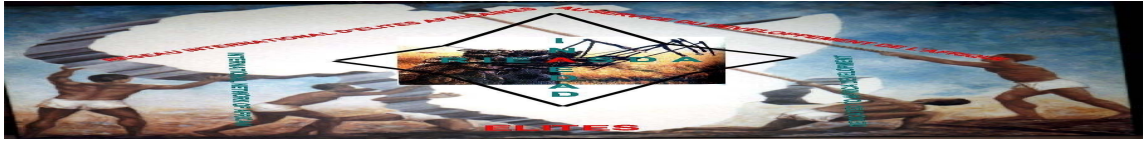

Development of small and medium-sized enterprises, rural co-operatives and scientific research are our priorities. We will direct our efforts towards efficient and effective promotion and the embedding of traditional pharmacopeias and biotechnology for health alleviation and food production, environmental management for increasing access to available and potable water, materials science and engineering for durable infrastructure and building structure as well as development of new technologies of information and communication. We believe that there are already remarkable amount of African expertises that needs to be channeled and willing non alienated foreign cooperation in these areas to make it happens. Nonetheless, emphasize will be put on political, judicial and economical purge from all constraints towards responsible collective development, by full awareness of taxpayers, which are the masses, concerning their rights and duties in the development process of Africa. Education and mentoring for all and spiritual life will be promoted for forgiveness, solidarity, entrepreneurship and conflict prevention. We will invest ourselves in getting the most out of published books and reviews on Africa as well as historical leaders' speeches, selected movies and individual experiences to mobilize and make information and knowledge work for genuine social and economic collective development.

Our actions are substantially collective and synergistic towards African masses interests and wealth by means of effective, durable and viable emergency entrepreneurship realizations. We are open to partnership and negotiation with other third parties for sustainable development for all.

The success of the network depends on the individual and collective will to make our knowledge and know-how available to each others and towards Africa, where it is mostly needed, means for deprived and ignored masses.

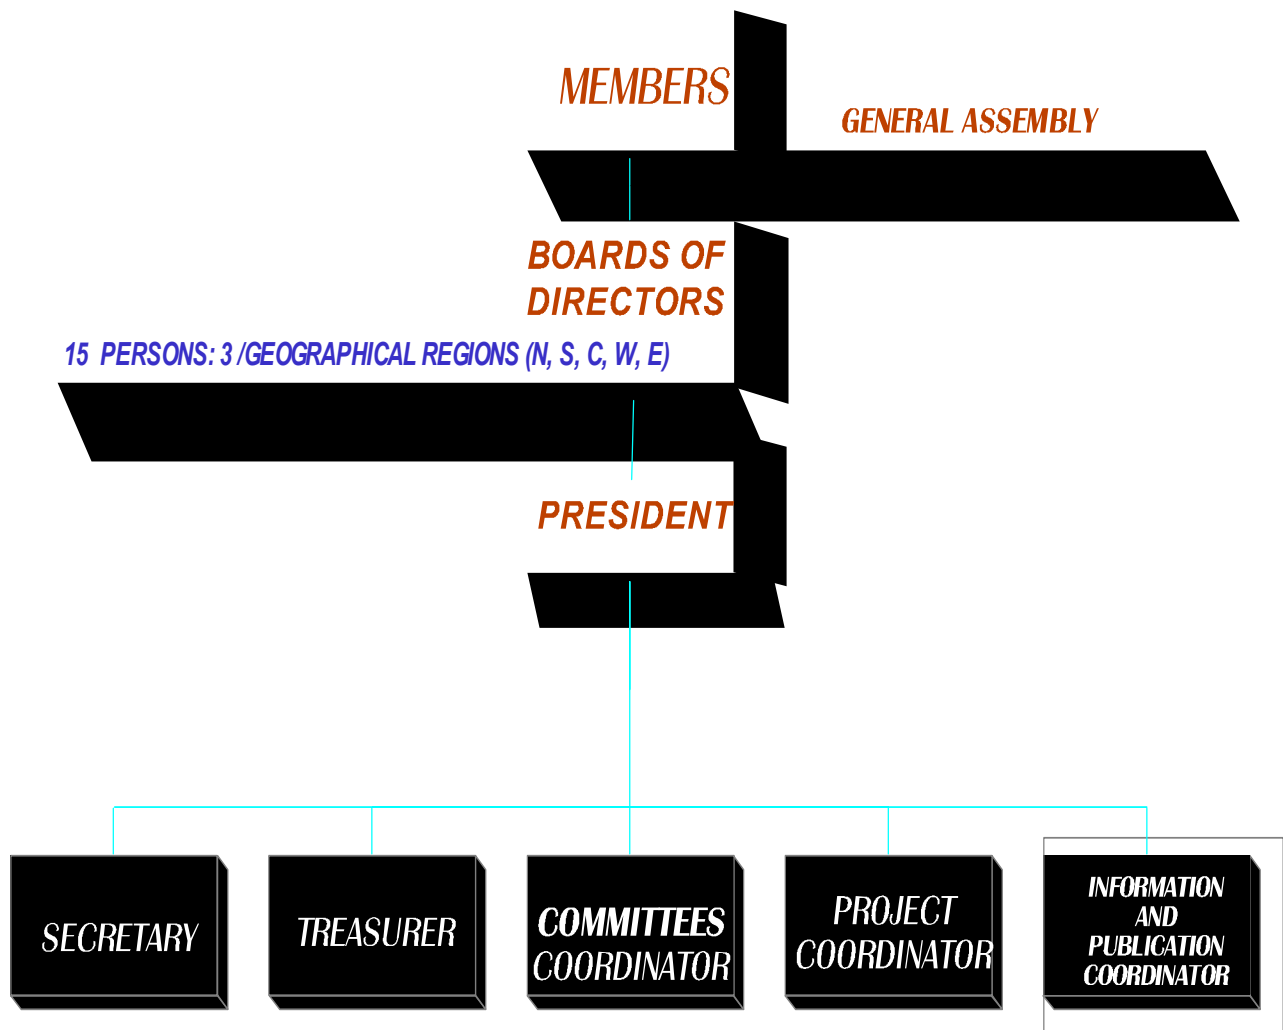

**Dr. DRAME Harouna, M.Sc., PhD**
